Display type

and title Body type Body type, also known as text type, is type that is designed to be read in large quantities at a small font size. It is usually less than 18 pixels. Example: Most newspaper, magazine, and web

Display type, also known as header type, is

typically 18 pixels and larger. It's usually used in

small quantities for emphasis and effect. Display

type helps define the page hierarchy and stands

When writing CSS, use px wherever dp or sp is stated.

Scalable pixels

page text.

Identified visual type scale There are multiple aspect ratios to pick from:

Golden Ratio - 1.618

Perfect Fifth - 1.500

Perfect Fourth - 1.333

16 x 1.333 = 21.328 (21)

How we came up with the next larger size

21 x 1.333 = 27.993 (28) and so on

To achieve proper readability and appropriate pacing, line heights are 10px more than the font

Body

Links

 Disclaimer Testimony • Header 3, 4

All other styles should exist as single(Auto) lines.

We picked **Perfect Fourth** based on our needs.

We used 16sp(scalable pixels) as a base font size.

Line height

size. Line wrapping only applies to the following:

Header 3: Lora-Regular - font size: 28sp, Line height: 38sp, Leading: 38sp

Children's bedtime story: Font size: 28sp 28sp Line height: 38sp 10sp The crow and the pitcher story 38sp Leading: 38sp In a spell of dry weather, when the Birds could find very

> With each pebble the water rose a little higher until at last it was near enough so he could drink. In a pinch, a good use of our wits may help us out. Do.
