

Colors

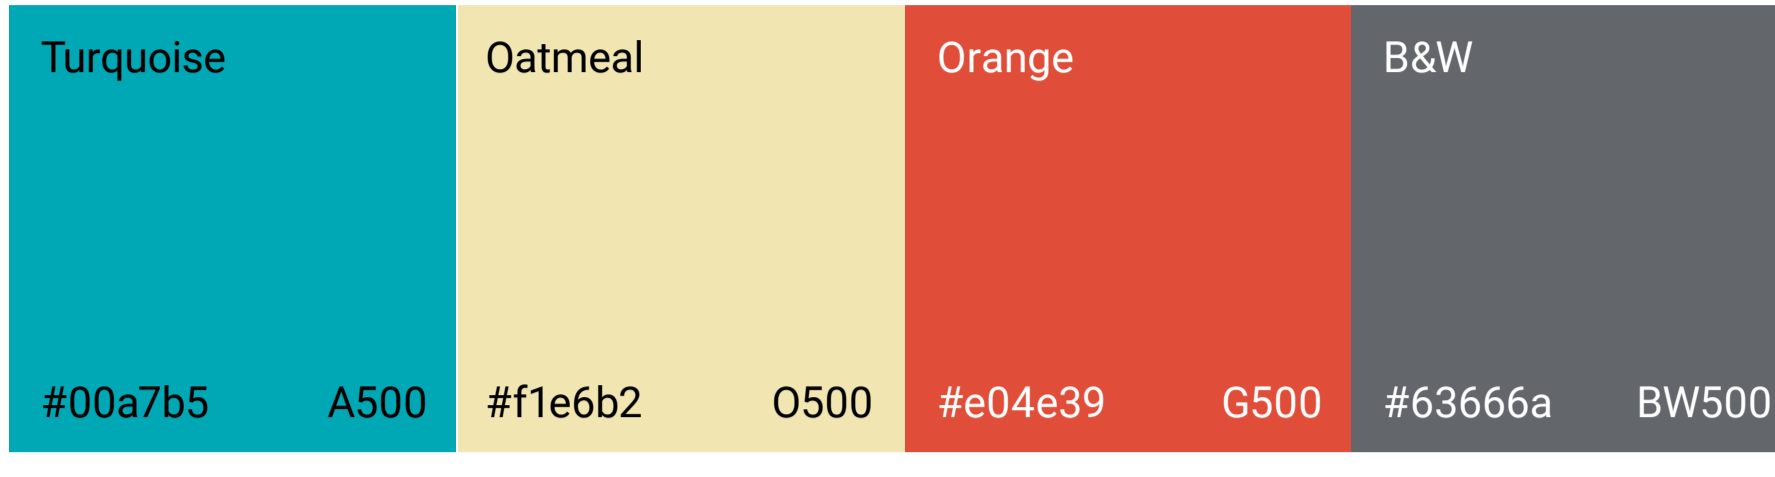

Primary brand color

When using a primary color in your palette, this color should be the most widely used across all screens and components.

Secondary brand colors

Palettes with a secondary color may use this color to indicate a related action or information.

Web user interface colors

Accent color is used for primary button and interactive elements:

- C500: Primary button
- Toggle switch - On
- slider - Active
- radio button - Selected
- check box - Selected
- Progress bar - Active bar

Greyscale is used for secondary button and some interactive elements:

- BW500: Secondary button
- Toggle switch - Off
- slider - Disable
- radio button - Not selected
- check box - Not selected
- Progress bar - Non-active bar
- Disabled button states
- Cards and some UI components

200 = lighter value (tint)
500 = Primary color
900 = Darker value (shade)

	#ffffff	White
	#f5f5f5	BW100
	#e0e0e0	BW200
Toggle slider bar	#ffb7b4	C200
	#c1c1c1	BW300

Gradient

is a combination of #0099d8, #00a7b5 and #f1e6b2

Color contrast check

www.webaim.org

WCAG 2.0 level AA

requires a contrast ratio of 4.5:1 for normal text and 3:1 for large text. Level AAA requires a contrast ratio of 7:1 for normal text and 4.5:1 for large text. Large text is defined as 14 point (typically 18.66px) and bold or larger, or 18 point (typically 24px) or larger.
